Mo is the man

By SPB

This guy has an imagination that every adult should strive to have at that age. His work is so creative and it's a shame that Father Time has taken away his great work. The book is great and the man who wrote it is equally great!

The background information is fascinating. The directions are detailed and helpful. Most importantly, the advice and recommendations regarding safety and use were exceptionally good.

All round reference quality

By K.T. Barthedor

This is the fourth treehouse book I've bought. If it had been the first, it would probably have been the last. There isn't much he doesn't cover from site evaluation and preparation to safety gear. I like following in detail a single project to completion through the book.
