Easy to read, informative, and interesting. - EXPENSIVE

By Brunswick McGabberhatchie

This book seemed very easy to read, the flow of literature was informative and easy to digest. No \$60 dollars words being thrown around, just simply put thoughts for the la-men man to comprehend. Tiger has taken several ideas, concepts and writing s from other tactical type authors and put them to use in a solid state. He has quotes from Jeff Cooper all the way to Bruce Lee. I found it to be a great building block nook, if you are interested in learning more about tactical defense/shooting, this is a great place to start. The techniques/methods that are explained regarding the 1911 are universal. The pistol techniques can be used for just about any pistol (maybe not a revolver)

Unfortunately, the only major draw back I found was the price. For the size of the book, \$25 is a bit steep, plus Amazon charged me about \$10 for shipping. Buyer beware of the shipping! Then again, I have purchase books on Amazon where the shipping is more then the book!

In the end, I enjoyed the book, and would recommend it. It only took me about three days to read it. It is a pretty thin book.

Maybe the best "beyond the basics" shooting book

By Currahee

Getting instructional information on practical shooting from a book is pretty hard. It is a "hands on thing" and there is no way of escaping this. But, Tiger McKee makes a good job of it here. The book is basically his observations from taking classes from and teaching practical rifle and pistol marksmanship for many years. There is a lot of interesting "mindset" and psychology of combat information up front that I really liked. Then the book gets down to business and covers various shooting, malfunction and tactical drills. While the book is mostly about the 1911 pistol and the AR carbine most of the skills will apply to any rifle/pistol

combo. If you read and then practiced what he says you will learn much faster than just practicing on your own. Some people might not like the format, basically the book looks like a classroom notebook, hand written and all, but I think it's pretty clever.

If Thunder Ranch Had a Handbook....

By AFN1000

This would be it. I enjoyed this book immensely because it has taken almost every important aspect that I have learned at Thunder Ranch and put it in a concise format that is easy to review and reenforces techniques that you may have forgotten. The tactics presented here are succinct and logical. It amazes me how much I pick up with each new paragraph and Tiger shares tactical aspects from the other schools he attended.

There are grammatical errors in the book and Tiger admits to this right up front but it really doesn't detract from the presentation considering this started as a training diary.

To really absorb the material, read a little at a time, make notes, review it again later until it sticks. There are literally hundreds of practical applications here. Sort of a Reader's Digest version or Cliff Notes of what you really need to know. One of the best books I have every read on fighting with a handgun or carbine.
